

**PRESS RELEASE
FOR IMMEDIATE DISTRIBUTION**

New image, website and headquarters for Virtual Guardian Inc.

Laval (Québec), April 20th 2010. Virtual Guardian Inc., leading IT security consultancy firm, announced today the launch of its new website and new corporate image. The company also announced the purchase of a new office situated in Laval's Cité de l'Avenir. This space will now serve as its headquarters.

"It's a historical day for our company," said Patrick Boucher, President and Founder of Virtual Guardian Inc. "We are extremely pleased with the corporate progress we have made in the past year. A year ago we became the first Canadian IT security company to get the ISO27001 certification and today we are forced to move due to rapid expansion; our industrial park office was no longer adequate due to lack of space. In addition to our move to a newly built office space, we are unveiling our new corporate image and new website. These are very exciting times for us," concluded Boucher.

Marco Estrela, Sales and Marketing Vice-President at Virtual Guardian had this to say about the company's new corporate image: "We were looking for an image that would reflect our experience and maturity. I'm thrilled that the new logo and website help us achieve that goal. We are now working on a few other projects which will be unveiled in the coming months. Those who want to keep abreast of our actions can get all the details off our website, which will be much more user-friendly than before."

Virtual Guardian's headquarters are now located at 1565, Boul. de l'Avenir, suite 110, in Laval, just a few minutes from Montmorency metro station. Internet users can get a glimpse of the new corporate logo on the company's new website at www.virtualguardian.ca.

ABOUT VIRTUAL GUARDIAN

Since its creation in 2003, Virtual Guardian has never ceased to push the limits of IT security research to become the industry leader it is today. In 2009, it became the first such company in Canada to be awarded with the prestigious ISO 27001 certification, the highest accreditation level in its field. Its team of experts conducts a wide range of services such as penetration testing, security audits, risk analyses and digital forensics investigations among others. Virtual Guardian's list of customers includes Desjardins Asset Management, Canada Economic Development, the Pierre-Boucher hospital and the Fonds de solidarité FTQ.
